Subject: Re: Heart samples

Hi [REDACTED]

We are trying to [REDACTED] fetal heart samples, so we are collecting all the samples we can get for now ([REDACTED] for adult heart tissues). The study is more stage dependent than quantity dependent, so for that we would need more stages at 9 weeks (or less) and 15 weeks (or more).

Best,
[REDACTED]

Hi [REDACTED]

Great, thanks for the heads up. Also, just a quick question- how many samples total are you trying to obtain for your study? I have written down that your goal was possibly 12 samples, but we have now given you 27. How many more are you looking to get? No rush on this.

Thanks,
[REDACTED]

Hi [REDACTED]

Thank you for the heads up. Nice to meet you [REDACTED] My cell is [REDACTED]

[REDACTED] so please do not collect any hearts [REDACTED]. Otherwise [REDACTED], we are still willing and able to receive the hearts. Thank you!

Best,
[REDACTED]

Hi [REDACTED]

I just wanted to give you a heads up that [REDACTED]. My colleague [REDACTED] will be taking over collections at Planned Parenthood [REDACTED]. I will be helping her out intermittently when I can, but she will be the primary person contacting you if/when she has any tissues for you. I am cc'ing her here for your convenience. Feel free to contact me if you have any questions or concerns. I will plan to give her your cell number as well.

Thanks!
